DECEMBER 2022

DEAR CUSTOMERS, SUPPLIERS AND FRIENDS OF BIMAX,

We wish you a wonderful Christmas,
full of rest, relaxation and joy.

We hope that the approaching New Year
brings prosperity and peace to all.
We wish you and your loved ones
good health and happiness
at this special time

Bimax team

WHAT'S NEW AT BIMAX?

Thank you Agnieszka!

You have been with Bimax for 20 years. Your work on our projects is very important to both our Clients and to us. On the occasion of such a noble jubilee, we would like to give you our best wishes: with good health, good luck and continued success in everything you do.

Dispa

Is a material made of 100% eco -paper. It is super white, has optimal stiffness, low weight and is perfect for printing. Being completely recyclable it is also simply perfect for short-term promotional and advertising campaigns.

Eco-revitalization of projects

We encourage you to consult us and recalculate repeat projects to be made from ecological substrates. Eco-materials are still moderately more expensive than substitutes, however, this margin has been decreasing and so for our clients we will try to "lose" the price of the substrate in the machining processes.

BimaxPRO

We have a sister company. In the next spring issue we will present the potential and possibilities of cooperation with BimaxPRO. Coming soon...

QUICK QUOTATION TOOL

Congestion in the valuation department

For several months now we have been noticing increased interest in our range of offers products and services. The reasons for this in the grand scheme of things may be political and economic phenomena, meaning the relocation of production from China to Europe, BREXIT, the increase in transport costs, or the actual demand for ecological products, etc. On a lesser scale, marketing activities and our Bimax information policy, whereby for two years now there has been in place a marketing department in our structure the sole purpose of which is to popularise our company's services. Due to the above facts, the waiting time for valuations from BIMAX has been extended.

New technology is at hand

In the very near future we will present our clients with a unique opportunity. We can boast of being the only company in the market to have such a tool at our disposal. We are planning to launch a proprietary pricing platform that we will make available to our key clients. Intelligent software will allow you to evaluate your project from anywhere in the world in only a few minutes. Oh yes. Self-pricing is going to be so quick and easy that it will take less time than writing an e-mail in asking for a quote from Bimax. How does it work?

Quick Quotation Tool (QQT)

The proprietary pricing mechanism has been programmed by a cutting-edge company within the IT industry. The software uses information on materials, prices and technologies typical to our business it provides a friendly interface, offering sequential stages of data entry, making the whole valuation processes quick and easy. You simply log into the system using your login name and password. The implementation of the tool will be accompanied by an instructional video and individual training.

TEAM

Agnieszka - the youngest employee of the graphics department. The embodiment of all professional virtues: competent, hard-working and dynamic. She rarely asks and usually takes the initiative. Agnieszka arranges graphic for our company newsletter and is perfect for an artistic and operational projects. Our technologists Michał is one of the most versatile and competent Bimax players. He controls the compute server room is our software specialist, can operate on most cutting machines, however, he has also been seen screwing in a light bulb....

A photograph of Agnieszka Gancarz sitting at a desk in an office. She is looking down at a laptop screen, which displays a grid pattern. On her desk, there are several items including a smartphone, some papers, and a small potted plant.
